In this year's study, 477 companies located in the following 15 countries participated: United States, United Kingdom, Germany, Canada, France, Italy, Japan, Australia, the Middle East, Brazil, India, South Africa, the ASEAN region (Singapore, Indonesia, the Philippines and Malaysia) and, for the first time, Turkey and South Korea.

What are companies doing to protect their data?

Data shows that companies are focusing on enhancing their data security infrastructure. The implementation of new encryption technologies and the adoption of robust cybersecurity measures are key strategies companies are employing to mitigate the risks associated with data breaches.

WAVELOGIC ENCRYPTION SECURE EVERY BIT OF YOUR IN-FLIGHT DATA 24/7
